

# ALASKA FAMILY ENGAGEMENT CENTER

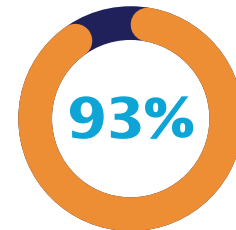

Decades of research show that when schools and families work together, kids thrive. We help schools and families partner with:

- Free, evidence-based tools and resources co-created by Alaskan families and educators.
- Hands-on training & coaching for staff and families in 14 school districts.
- Family engagement-focused virtual training and conference sessions for all educators.
- Facilitation support to help navigate community-school conversations.

## HOW MUCH:

## HOW WELL:

Participating staff agreed the family engagement training was relevant and useful.

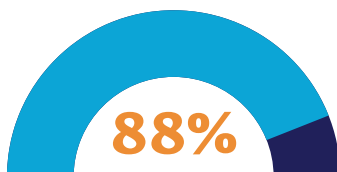

## WHAT DIFFERENCE DOES IT MAKE:

*"Now I have the courage to keep pushing forward with [the] belief [that family engagement is important]."*

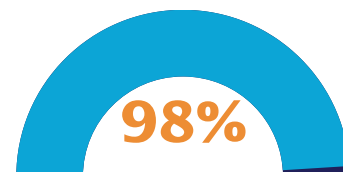

- Parent of a student with special needs

*"I feel like in the district I work in...family engagement wasn't even talked about. We didn't know, like what to do or how to do it. And now family engagement is starting to grow in our district with the help from AFEC."*

- School staff participant

88% of families became more comfortable working with teachers to support their child's reading and became more confident working with their child on reading outside of school.

98% of staff who participated in training reported having enhanced capacity to work with families to meet the academic and developmental needs of their children.
